

## **Sprint Retrospective**

Team Name: Irregular Innovations

Team Members: Hassan Al Lawati, Chris Maude, Jason Morales, Hoanh Nguyen, Faizan Zafar

What went well:

1. The products that we produced look very good generally
2. Our project has made great progress
3. Our use of the asset store paid off
4. Our sprint was smoother this time around

What didn't go well:

1. We had some merge conflicts
  - a. Coordinate better when merging
2. Some of our files were not in formats that all operating systems could use
  - a. Avoid file types that are not OS agnostic
3. We had a couple of tasks roll over from the last sprint
  - a. While this was not catastrophic, it does mean that we found the edge of what we are able to accomplish in a sprint, and thus we should avoid overburdening ourselves with tasks for future sprints.
